Paper 3 Calculator

Monday 13 November 2023

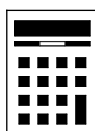

Morning

Time allowed: 1 hour 30 minutes

## Materials

For this paper you must have:

- a calculator
- mathematical instruments
- the Formulae Sheet (enclosed).

## Instructions

- Use black ink or black ball-point pen. Draw diagrams in pencil.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

## Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.
- You may ask for more answer paper, graph paper and tracing paper. These must be tagged securely to this answer book.

## Advice

In all calculations, show clearly how you work out your answer.

### For Examiner's Use

| Pages        | Mark |
|--------------|------|
| 2–3          |      |
| 4–5          |      |
| 6–7          |      |
| 8–9          |      |
| 10–11        |      |
| 12–13        |      |
| 14–15        |      |
| 16–17        |      |
| 18–19        |      |
| 20–21        |      |
| 22–23        |      |

 $p = \underline{\hspace{2cm}}^\circ$ 

- 13** 100 people were asked about the distance they travel from home to work.  
The table shows information about the results.

| Distance, $d$ (miles) | Frequency |
|-----------------------|-----------|
| $0 \leq d < 5$        | 21        |
| $5 \leq d < 10$       | 24        |
| $10 \leq d < 20$      | 37        |
| $20 \leq d < 40$      | 18        |

- 13 (a)** Write down the **greatest** possible number of people who work from home.

[1 mark]

Answer \_\_\_\_\_

- 13 (b)** One person is chosen at random.

Work out the probability that the person travels **at least** 10 miles.

[1 mark]

\_\_\_\_\_

Answer \_\_\_\_\_

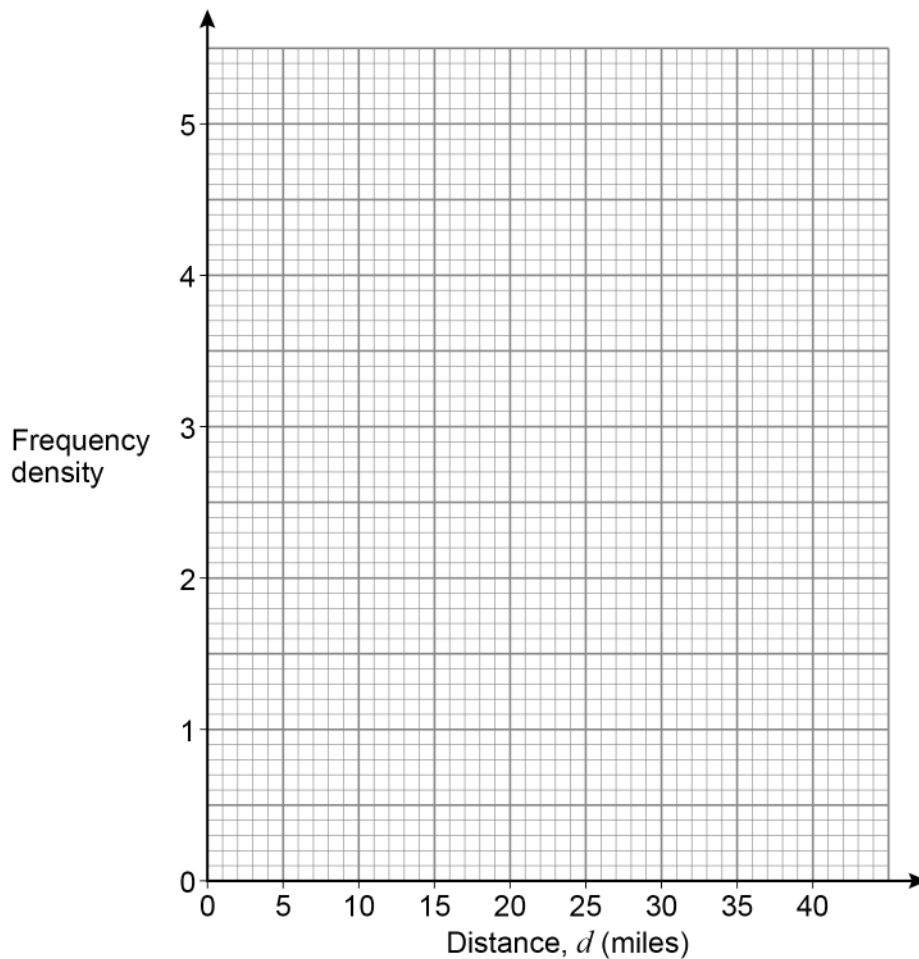

13 (c) The table is repeated.

| Distance, $d$ (miles) | Frequency |
|-----------------------|-----------|
| $0 \leq d < 5$        | 21        |
| $5 \leq d < 10$       | 24        |
| $10 \leq d < 20$      | 37        |
| $20 \leq d < 40$      | 18        |

Draw a histogram to represent the results.

[3 marks]

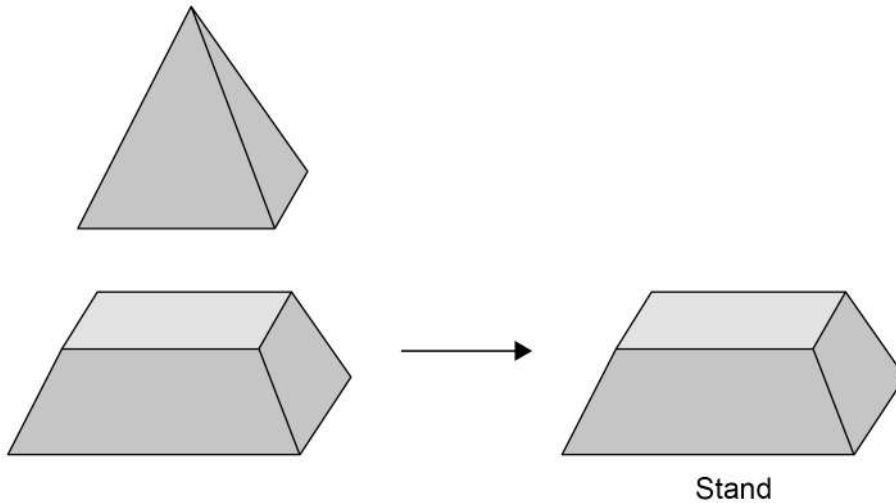

- 14 A solid trophy consists of a stand and a player.

Trophy

The stand is made by removing a small pyramid from a large pyramid.

|                      |                        |                            |
|----------------------|------------------------|----------------------------|
| <b>Large pyramid</b> | Square base, edge 8 cm | Perpendicular height 16 cm |
| <b>Small pyramid</b> | Square base, edge 5 cm | Perpendicular height 10 cm |

$$\text{Volume of a pyramid} = \frac{1}{3} \times \text{area of base} \times \text{perpendicular height}$$

- 14 (a) Show that the volume of the **stand** is  $258 \text{ cm}^3$

[2 marks]

---

---

---

---

---

---

- 14 (b) The trophy is made from a metal of density  $7.5 \text{ grams per cm}^3$   
The **total** mass of the trophy is 2340 grams.

Work out the volume of the **player**.
