22 The stem and leaf diagram shows the test scores of 23 students from School A.

3	0
4	1 2 4 4 5 7
5	3 4 4 6 <u>7</u> 8 8 9
6	0 8 8 9 9
7	1 3 9

Key:

3 | 0 represents 30

23 students from School B did the same test.

Their median score was 56

The range of their scores was 47

Compare the distribution of the test scores of the students from School A with the distribution of the test scores of the students from School B.

Median of School A = 57 > 56 so on average A did better

Range of A = $79 - 30 = 49$ > 47 so A's results were more varied.
