Mathematics A

PAPER 1HR

Higher Tier

You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser, calculator. Tracing paper may be used.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Without sufficient working, correct answers may be awarded no marks.
- Answer the questions in the spaces provided
– there may be more space than you need.
- **Calculators may be used.**
- You must **NOT** write anything on the formulae page.
Anything you write on the formulae page will gain NO credit.

Information

- The total mark for this paper is 100.
- The marks for **each** question are shown in brackets
– use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

Answer **ALL TWENTY FOUR** questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 n is an integer.

(a) Write down all the values of n such that $-2 \leq n < 3$

$-2, -1, 0, 1, 2$
(2)

(b) On the number line, represent the inequality $y \leq 1$

Jonty is going to paint the outside of his storage container, apart from the base which is shown shaded in the diagram.

He needs enough paint to cover the four sides and the top.

Each tin of paint covers an area of 15 m^2

The cost of each tin of paint recently increased by 10% $\rightarrow \times 1.1$

After the increase, the cost of each tin of paint is £26.95

Jonty says

"Before the increase, I could have bought enough paint for less than £200"

Show that Jonty is correct. ✓
